

Jisaquel®

Mn 13

EC FERTILIZER

Manganese EDTA chelate

GUARANTEED RICHNESS

Total manganese (Mn) water soluble	13% w/w
Manganese (Mn) EDTA chelate	13% w/w
Chelate stability ranking: between pH=3 and pH=11	

PROPERTIES

JISAQUEL Mn 13 is presented as a soluble micro-granule completely chelated by EDTA, that means that it is easily absorbed by the plant.

JISAQUEL Mn 13 is especially recommended to correct manganese shortages. This trace element mainly contributes in the process of protein formation and photosynthesis.

Manganese shortage appears first in young leaves where chlorosis shows up in the limb and causing necrotic patches in some cultures.

DOSAGE AND INSTRUCTIONS FOR USE

JISAQUEL Mn 13 can be applied by foliar application, added to the soil with any irrigation system and in hydroponic crops.

Foliar application:

Maintenance: 50-100 g/hl.
Evident shortage..... 100-200 g/hl.

Soil application:

3-6 kg/ha. repeat treatment if shortage persist.

COMPATIBILITY

Do not mix with alkaline products or with very acid reaction.

PRESENTATION

1; 5 & 20 Kg.
